CSEO!	itle ANT ON RAIL Description in Paragraph of the control of the	
schi csto	There is a ant on your balcony.It wants to leave the rail so sometimes it moves right and sometimes it moves left until it gets	S
	exhausted.Given an integer array A of size N which consists of integer 1 and -1 only representing ant's moves.	
EMPBIC	Where 1 means ant moved unit distance towards the right side and -1 means it moved unit distance towards the left .Your task is to find and return the integer value representing how many times the ant reaches back to original starting position.	<u> </u>
(E)	Note:	,
,		
CSEDAR	Assume that the railing extends infinitely on the either sides	(
C	A CONTRACTOR OF THE CONTRACTOR	
~	Input Format:	
MPBlech	input1: An integer value N representing the number of moves made by the ant.	4
D.	input2 : An integer array A consisting of the ant's moves towards either side	_
